Talking points

• Amounts are compared in code ("calculated"), not by the AI; units and bases must match (per bank vs aggregate).

• Each flag cites its source; click it to open the minute-book page (register rows have no page image).

• Items 2 and 5 show superseded decisions: the latest resolution in force is used.

• Flags are for review by the Secretarial team, not a legal or compliance opinion.

• The scanned PDF gives the same results and shows the "read with OCR" note.

• Wording varies from run to run; the statuses were the same on the Word and the scanned versions.
